

## Safe Cash Transportation Businesses

- ✚ When closing up your business late at night keep a lookout that you are not being watched
- ✚ Call a friend, business colleague or family, to say when you are leaving the premise and when you arrive at your destination.
- ✚ When transporting cash, if the amounts are high, whatever the distance, the cash should be carried by a group of two or three staff members distributed between them.
- ✚ It is better to make use of a vehicle from as close as possible to the starting and destination points.
- ✚ Knowledge of cash handling arrangements should only be known to those who need to know.
- ✚ Cash transportation times should be varied and routes varied as well.
- ✚ Check if you are being followed.
- ✚ Business owners need to balance the need of taking money home after closing rather than keeping the money in a safe on the premise. There have been cases where owners have been followed to their home and the robbed.
- ✚ If amounts are very high employ a security company to transport the cash safely.
- ✚ Finally do not put staff at risk
