Supply and fit high security cylinders and locking systems

Supply and fit secondary security devices such as window locks, door viewers etc

Lock repair service

24 Hour emergency door opening using non destructive techniques

Brief Company History

Chris was trained by a former SAS locksmith in Hereford and brought his locksmith skills to the Algarve in 2009. He has steadily built up an impressive client portfolio including many leading property agents. With so much experience working specifically with locks in the Algarve there is little Chris doesn't know about locks in this area.

Company slogan

Non destructive!

Chris is highly skilled in the art of non destructive entry techniques where the aim is to only use a drill as a last possible course of action if you are locked out. The same ethos applies to any job he undertakes where maximum care is always taken. His security advice will also take into consideration the aesthetics of your current fixtures and fittings.

Crime Prevention and Service Quality Approach

Chris will approach every job from a position of “how can we improve your overall security” and will offer impartial advice based on his experience and knowledge. For example you may wish to upgrade your front door lock whilst being unaware that your property has other weaker entry points. Chris will advise you on all aspects with a view to making it more difficult for a potential intruder to gain access.
