### Overview of services

High quality outdoor and indoor sun-, wind- and rain solutions, from awnings to Venetian blinds. Toldolanda will make your Outdoor living enjoyable and your indoor living comfortable.

### Brief Company History

Toldolanda Lda have been supplying high quality awnings for over 30 years. We have built up years of experience in the Dutch awning market and started providing awnings in the Algarve since 1999. Since 2009 we have been operating as Toldolanda Lda.

Our expertise and excellent products - such as Weinor, Brustor, Livium and Heroal - enables us to provide state-of-the art sun/rain/wind solutions. Together with this, our certified staff will ensure that we provide the best experience when finding the right sun/rain/wind solution for you.

### Brief Personal Background

I have been spending my holidays in the Algarve since the early 70's and lived here since 1985.

On one of my visits to Holland I have met my husband Ron, who already at that time had an awning company in Holland.

Ron immediately realized there was a lot of sun in the Algarve and still a lot of awnings to fit and sun solutions to be found. The main challenge was the sun in combination with the wind, which we have dealt with by choosing for Weinor as our main supplier.

In 2011 we have sold our Dutch awning company and moved permanently to the Algarve to be able to run Toldolanda Lda ourselves fulltime.

### **Company slogan**

There will always be a solution

### **Crime Prevention and Service Quality Approach**

As all our products can be supplied with remote control, sensors and timers, so we can program your shutters, roller curtains and or awnings to be open and closed while you're away of your home.

This will give the impression that the house is not unoccupied.
